Summary

Cybersecurity-focused computer science student with hands-on experience in secure infrastructure, network segmentation, and log analysis. Builds and operates homelab environments and practices offensive security through CTFs, with a strong interest in automation and Infrastructure-as-Code.

Technical Skills

Security: SIEM pipelines, network monitoring, web security, Linux hardening

Infrastructure & Cloud: Proxmox, Docker, Terraform, Ansible, AWS

Tools: Wireshark, Nmap, Burp Suite, Elastic Stack, Git

Languages & OS: Python, Go, Bash; Linux (Arch/Ubuntu), Windows

Professional Experience

Systems Security Intern — Wintics (Paris, France)

Jun. – Aug. 2025

- Developed an **Ansible**-based hardening framework enforcing **CIS and ANSSI benchmarks**.
- Implemented security controls for SSH, authentication, logging, firewalling, and audit compliance.
- Implemented automated **standards-compliance audits** with structured security reports.
- Authored **operator-facing documentation** and troubleshooting playbooks for handover to ops teams and future interns.

Projects

Homelab — Secure Self-Hosted Services & Network Lab

2025 – Present

- Built and operated a **Proxmox-based homelab** hosting **VMs and containers** for self-hosted applications and security infrastructure.
- Deployed **self-hosted services** including file synchronization and password management.
- Designed a **segmented virtual network** using **pfSense** with controlled inter-segment routing.
- Implemented **secure remote access** via a **WireGuard VPN** for off-site access to internal services.
- Deployed a **SIEM stack** to collect and analyze logs from hosts, network devices, and applications.
- **Currently migrating infrastructure to IaC** using **Terraform** and **Ansible**.

Offensive Security Practice & Tooling (CTFs)

2024 – Present

- TryHackMe: **Top 1%** user; Hackfest 2025 (Québec) — HFCTF: **22nd/59 teams (1300/3970 pts)**
- Authored **detailed technical write-ups** documenting exploitation paths and remediation strategies.
- Practiced **web exploitation, service enumeration, privilege escalation**.
- **Developing a custom reconnaissance tool** for lab environments, supporting host discovery, port scanning, web fuzzing, and basic service authentication testing (SSH/FTP).

Education

Université du Québec à Chicoutimi (UQAC) — Canada

2025 – 2026

MSc in Computer Science (Cybersecurity) — Double-degree with Télécom Nancy

Télécom Nancy — France

2023 – 2026

Engineering / MSc-level program in Computer Science (Networks & Security) - **Top 3 France**

Lycée Chaptal — Paris, France

2021 – 2023

MPSI / MP* — Highly selective two-year pre-engineering program (intensive mathematics and physics)

Languages

English (C1 - TOEIC), French (native), Chinese (native)
